

# Juvenile Abuse/Neglect Intake Notice to Law Enforcement

## Glossary of Terms

---

**NFOCUS** -- Comprehensive social service system developed by Health and Human Services that provides, in part, protective services case management services including: Intake; Person information, status, and relationship; Case information; Evaluation; Safety Plan; Placement and visitation; Legal actions; and, Case Plan.

**JIEM – Justice Information Exchange Model:** An online tool designed to facilitate the development of integrated justice information systems planning and implementation. Integration of justice information systems refers to the justice community's ability to access and share critical information at key decision points throughout the justice process. The JIEM tool allows the user to identify and model GLOBAL compliant criminal justice information exchanges.

**GLOBAL** – An international consortium of criminal justice and homeland security agencies working together to establish standards. Global has sponsored the following initiatives:

**GJXDM – Global Justice XML Data Model:** An object-oriented data model used to organize the content of a data dictionary (the Global JXDD) in a database. From this database an XML schema specification can be generated that consistently represents the semantics and structure of common data elements and types required to exchange information within the justice and public safety communities.

**GJXDD – Global Justice XML Data Dictionary:** The Global JXDD contains the semantics of criminal justice data elements that are implemented as a relational database. This database is used with the data model to generate a consistent representation in a XML Schema.

**GJXDM SSGT – Global JXDM Custom Schema Subset Generation Tool:** An online prototype that enables a user to identify required Global JXDM components (using the Global JXDM Viewer), sequence them, and generate a correct schema subset of the Global JXDM for a specific application.

**EIM – Electronic Interface Manager:** A web service that provides the infrastructure and supports consistently structured transmission payloads (queries, messages, and documents) to facilitate interoperability and information exchange among disparate computing systems.

**NCJIS – Nebraska Criminal Justice Information System:** Comprehensive repository of criminal justice related information including: Arrest; criminal history; custody; probation; court cases; protection orders; motor vehicle; driver history; corrections; and similar data. NCJIS provides extensive search capabilities across multiple data repositories.
